Astute Graphics announces the release of a unique Illustrator color control plugin

Astute Graphics is proud to announce the availability of a new and unique plugin for Adobe Illustrator®, “Phantasm CS”, giving full color adjustment control such as brightness, contrast, curves, hue, saturation and levels directly within your Illustrator document.

Offering a comprehensive range of professional-grade color controls as both Filters and live Effects, this plugin is designed to tightly integrate into Adobe’s leading vector design package, virtually removing any learning curve. With the ability to control all object types including simple vector shapes, other live Effects, high resolution bitmaps, this plugin allows a user to fine-tune, match colors and experiment with designs with immediate visual feedback.

With the development process being overseen by an experienced professional designer and extensive testing in the hands of some of the leading international illustrators and publishers, this plugin caters for real-world designers, publishers and printers.

Priced at only \$37.50, it is accessible to hobbyist users and yet offers the level of control demanded by professionals. Phantasm CS is set to become the number one addition to all Illustrator’s toolkits.

Phantasm CS is available for Windows® and Mac OS X® running both Illustrator CS and CS2.
